

# Foundation Transition Program

## 2025 ENROLMENTS

Starting school is an exciting time for both students and families. We understand that with new beginnings you and your child may be experiencing mixed emotions. Our Foundation Transition Program aims to set students and families up for success as they begin their first year of school. Across the five transition sessions students will engage in both classroom and specialist learning experiences,

- Meet the Foundation teachers and Specialist teaching team
- Get to know their new classmates
- Begin to learn simple school routines and explore our teaching and learning spaces
- Engage in a range of classroom and specialist learning experiences
- Meet their Grade 6 Buddies

In the final session, Smart Start, students will be with their 2025 class and teacher.

During the first two sessions, parents are encouraged to attend information sessions covering content such as the curriculum, school procedures, supporting your child with their learning and well-being.
